Writing More Effective Grant Proposals

Jason Hale
September 19, 2016
Tips for Today

1. Take Time to Learn the Rules (Internal/External): *Follow The Rules*
2. Know What You Want to Say: *Say It; Ask Someone to Read It; Repeat*
3. Know What the Sponsor Wants to Hear
4. Translate What You Want to Say into What the Sponsor Wants to Hear
5. Write like a Lawyer, a Journalist, and a Scholar (in that order)
6. Be Specific; Be Considerate; Be Factual
7. Anticipate that Your 1<sup>st</sup> Draft Will Suck: *Make Plans to Get Help Fixing It*
8. Anticipate that Your 1<sup>st</sup> Proposal Will Be Declined: *Adapt and Overcome*
Tips for Today

1. Take Time to Learn the Rules (Internal/External): Follow The Rules
2. Know What You Want to Say: Say It; Ask Someone to Read It; Repeat
3. Know What the Sponsor Wants to Hear
4. Translate What You Want to Say into What the Sponsor Wants to Hear
5. Write like a Lawyer, a Journalist, and a Scholar (in that order)
6. Be Specific; Be Considerate; Be Factual
7. Anticipate that Your 1st Draft Will Suck: Make Plans to Get Help Fixing It
8. Anticipate that Your 1st Proposal Will Be Declined: Adapt and Overcome
Take Time to Learn the Rules

• Internal Rules – What does **UM** require and allow?  
  
  Failure to follow UM rules may lead to UM declining to submit your proposal to the sponsor.

• External Rules – What does the **sponsor** require and allow?  
  
  Failure to follow the rules may lead to your proposal be returned without review by the sponsor.
Take Time to Learn the Rules (External)

- Sponsor’s Funding Opportunity Solicitation/RFP/BAA
- Sponsor’s general grant proposal guidelines
- Any restrictions on F&A recovery? Which rate applies? (research 48%; instruction 50%; other 29%)
- Any cost share requirements?
- Who is eligible to apply?
- Deadlines (including times, formats)
- Required docs, sections, pages, words, margins, fonts...
- For all Federal funding sources: the Uniform Guidance
  [http://www.ecfr.gov/cgi-bin/text-idx?tpl=/ecfrbrowse/Title02/2cfr200_main_02.tpl](http://www.ecfr.gov/cgi-bin/text-idx?tpl=/ecfrbrowse/Title02/2cfr200_main_02.tpl)
Take Time to Learn the Rules (Internal)

- Who will cover the cost share?
- How can federal grant funds be spent at UM on personnel, fringes, equipment, services, commodities, travel, tuition, etc.
- ORSP deadlines (including times)
  - ORSP On-Time Proposal: 5 working days ahead
  - Enhanced ORSP Reviews: 15 working days ahead
- Research integrity and compliance
- Intellectual property & confidentiality protection
- Financial Conflicts of Interest?
Take Time to Learn the Rules - example

Rules for NSF Project Summaries:

• Self-contained description of the activity that would result if the project were funded

• Not an abstract of the proposal itself
  • Don’t refer to “this proposal”
  • Not an introduction

• Written in 3rd person

• State methods and objectives

• Understandable by an educated lay reader

• Separate statements for:
  • Overview
  • Intellectual Merit
  • Broader Impacts
“In 2010, then Mississippi Governor Haley Barbour negotiated with AT&T to create the Mississippi Optical Network (MissiON). In this proposal, we describe our vision to use NSF funds to upgrade MissiON, a regional higher education research network. The plan is to: 1) increase aggregate connectivity through the Internet2 POP from 10Gbps to 100Gbps; 2) incorporate for the first time Mississippi’s 15 community colleges; and 3) incorporate (and connect for the first time to Internet2) a regional university from the Delta. We plan to enable greater participation in data-intensive research across our state.

Any jargon here?
Any use of 1st person?
Any unnecessary background statements?
Any references to the proposal itself?
“In 2010, then Mississippi Governor Haley Barbour negotiated with AT&T to create the Mississippi Optical Network (MissiON). In this proposal, we describe our vision to use NSF funds to upgrade MissiON, a regional higher education research network. The plan is to: 1) increase aggregate connectivity through the Internet2 POP from 10Gbps to 100Gbps; 2) incorporate for the first our state’s Mississippi’s 15 community colleges; and 3) incorporate (and connect for the first time to Internet2) a regional university from the Delta. We plan to enable greater participation in data-intensive research across our state.”
“The Mississippi Optical Network (MissiON), a regional higher education research network, will be upgraded to: 1) increase by ten the bandwidth of MissiON’s connection to a national research network—Internet2; 2) incorporate for the first time Mississippi’s 15 community colleges; and 3) incorporate (and connect for the first time to Internet2) a regional university from the Mississippi Delta. The enhanced network will enable greater participation in data-intensive research by faculty and students from these community and regional colleges, and enhanced data-intensive collaborations between Mississippi’s research-intensive institutions and their partners across the national research enterprise.”
Tips for Today

1. Take Time to Learn the Rules (Internal/External): *Follow The Rules*
2. **Know What You Want to Say:** *Say It; Ask Someone to Read It; Repeat*
3. Know What the Sponsor Wants to Hear
4. Translate What You Want to Say into What the Sponsor Wants to Hear
5. Write like a Lawyer, a Journalist, and a Scholar (in that order)
6. Be Specific; Be Considerate; Be Factual
7. Anticipate that Your 1st Draft Will Suck: *Make Plans to Get Help Fixing It*
8. Anticipate that Your 1st Proposal Will Be Declined: *Adapt and Overcome*
Tips for Today

1. Take Time to Learn the Rules (Internal/External): *Follow The Rules*
2. Know What You Want to Say: *Say It; Ask Someone to Read It; Repeat*
3. **Know What the Sponsor Wants to Hear**
4. Translate What You Want to Say into What the Sponsor Wants to Hear
5. Write like a Lawyer, a Journalist, and a Scholar (in that order)
6. Be Specific; Be Considerate; Be Factual
7. Anticipate that Your 1ˢᵗ Draft Will Suck: *Make Plans to Get Help Fixing It*
8. Anticipate that Your 1ˢᵗ Proposal Will Be Declined: *Adapt and Overcome*
Know What the Sponsor Wants to Hear: Carefully Parse the External Requirements (Solicitation)

Synopsis of Program:

The STEM-C (Science, Technology, Engineering and Mathematics, including Computing) Partnerships program is a major research and development effort of two NSF Directorates, the Directorate for Education and Human Resources and the Directorate for Computer and Information Science and Engineering, which supports innovative partnerships to improve teaching and learning in science, technology, engineering, and mathematics (STEM) disciplines. STEM-C Partnerships combines and advances the efforts of both the former Math and Science Partnership (MSP) and the former Computing Education for the 21st Century (CE21) programs. It is critical that our nation maintain a competent, competitive and creative STEM workforce, including teachers. Therefore, NSF aims to inspire and motivate the next generation of that workforce, while ensuring that it has the skills, competencies, and preparation to be successful. As we transition to a global, knowledge-based economy that is often driven by information technology and innovation, it is increasingly important that STEM workforce preparation includes a strong foundation in computing. Thus, the STEM-C Partnerships program addresses both the need for advances in K-12 STEM education generally, as well as the need to elevate the inclusion of computer science education.

From MSP, STEM-C Partnerships embraces any of the STEM disciplines -- within the natural science, mathematics, engineering, or computer science -- and maintains its commitment to institutional partnerships and opportunities for funding of Targeted proposals in one of four focal areas: Community Enterprise for STEM Teaching and Learning, Current Issues Related to STEM Content, Identifying and Cultivating Exceptional Talent, and K-12 STEM Teacher Preparation. From CE21, STEM-C Partnerships adds a discipline-specific focal area on the teaching and learning of computing and computational thinking, a strong commitment to broadening participation in computing, an emphasis on in-service teacher professional development, and support for the implementation of computer science courses at the high school level. It is expected that the merging of the MSP and CE21 programs will strengthen both and serve as a model for future incorporation of discipline-specific concerns into programs focused more broadly on STEM.

The STEM-C Partnerships program supports partnerships that promote effective K-12 STEM education, building knowledge of teaching and learning in ways that deepen understanding and stimulate further exploration of STEM
Tips for Today

1. Take Time to Learn the Rules (Internal/External): *Follow The Rules*
2. Know What You Want to Say: *Say It; Ask Someone to Read It; Repeat*
3. Know What the Sponsor Wants to Hear
4. **Translate What You Want to Say into What the Sponsor Wants to Hear**
5. Write like a Lawyer, a Journalist, and a Scholar (in that order)
6. Be Specific; Be Considerate; Be Factual
7. Anticipate that Your 1\textsuperscript{st} Draft Will Suck: *Make Plans to Get Help Fixing It*
8. Anticipate that Your 1\textsuperscript{st} Proposal Will Be Declined: *Adapt and Overcome*
## Translate Into What the Sponsor Wants to Hear

Make a Strong First Impression: The Opening Statement

• A Few Good Words
• Crisp. Clear. Memorable.
• Specific.
• Lens through which to view all that is to follow.

*A Few Good Men:*

Prosecution Opening:

https://www.youtube.com/watch?v=pDnFnxSU1GU

Defense Opening:

https://www.youtube.com/watch?v=_qUUagxxM2M
“The FACTS of the case are these:

• On midnight of September 6th, the accused entered the barracks room of their platoon mate, PFC William Santiago.

• They woke him up, tied his arms and legs with tape, and forced a rag into his throat.

• A few minutes later a chemical reaction called *lactic acidosis* caused his lungs to begin bleeding.

• He drowned in his own blood and was pronounced dead at 37 minutes past midnight.

...  

These are the FACTS of the case, and they are UNDISPUTED.”
“There was NO POISON ON THE RAG and there was NO INTENT TO KILL; and any attempt to prove otherwise is futile ‘cause it just ain’t true.

When Dawson and Santiago went into Santiago’s room that night…it’s because it was WHAT THEY WERE ORDERED TO DO.

Now, out in the real world that means nothing....But if you’re a Marine, assigned to Rifle Security Company Windward, Guantanamo Bay, Cuba, WHEN YOU ARE GIVEN AN ORDER, you FOLLOW IT, or you PACK YOUR BAGS.

Make no mistake about it. Harold Dawson and Lowden Downy are sitting here before you today, because they DID THEIR JOB.”
No African-American students and no female students of any race or ethnicity have been known to pass an Advanced Placement computer science exam in Mississippi in at least the last decade.

The University of Mississippi will incentivize and train 48 practicing Mississippi teachers to offer Advanced Placement (AP) Computer Science Principles in some of the nation’s most underserved public schools.

The result will be a 40-fold increase in Mississippi enrollments in AP Computer science courses, and a corresponding increase in the number of students who successfully complete the AP Computer Science Principles exam (with a score of at least 3 out of 5).
Write Like a Journalist: Don’t Bury the Lead

Journalists use *Inverted Pyramid Style* for news stories.
Front-load your proposal with the most important points first; the rest is just supporting information.

Do not assume everyone is interested in what you have to say; do not assume all reviewers will read your entire proposal.

If you can interest them, great. If not, make sure they learn your intentions by reading the first few sentences.
Tips for Today

1. Take Time to Learn the Rules (Internal/External): Follow The Rules
2. Know What You Want to Say: Say It; Ask Someone to Read It; Repeat
3. Know What the Sponsor Wants to Hear
4. Translate What You Want to Say into What the Sponsor Wants to Hear
5. Write like a Lawyer, a Journalist, and a Scholar (in that order)
6. Be Specific; Be Considerate; Be Factual
7. Anticipate that Your 1\textsuperscript{st} Draft Will Suck: Make Plans to Get Help Fixing It
8. Anticipate that Your 1\textsuperscript{st} Proposal Will Be Declined: Adapt and Overcome
Be Specific; Be Considerate; Be Factual

- Lay out specific, measurable, objectives
- Give specific timelines and milestones
- Cite specific performance record
- Give specific expected impacts
- Describe specific approaches

- Demonstrates that you’ve thought things through
- Demonstrates competence
- Instills reviewer confidence
- Anticipates and proactively answers reviewer questions
Be Specific; Be Considerate; Be Factual

Broader Impacts: Will the project....
- Utilize activities that are directly related to specific research projects
- Utilize activities that are supported by, but are complementary to the project
- Fully engage women, persons w/ disabilities, & underrepresented minorities
- Improve STEM education and educator development at any level
- Increase public scientific literary and public engagement w/ science & technology
- Improve well beings of individual in society
- Develop a diverse, globally competitive STEM workforce
- Increase partnership between academia, industry and other
- Improve national security
- Increase economic competitiveness of the United States
- Enhance infrastructure for research and education
Be Specific; Be Considerate; Be Factual: List Specific Broader Impacts for NSF Proposals

Increasing participation in STEM (computing) programs and careers

- African Americans
- Women
- Hispanics
- Native Americans
- Native Alaskans and Hawaiian Islanders
- Persons with Disabilities

Research Opportunities for Undergraduate Students

K-12 STEM Outreach Programs

Increasing institutional, regional, & national research infrastructure

Benefiting society
A group of tick researchers at UM has offered an exciting course on ticks, edited a useful handbook on ticks, developed several outreach programs, and collaborated on lots of research.

Exercise: What words in the text above are too general (not specific enough)?
A group of tick researchers at UM has offered an exciting course on ticks, edited a useful handbook on ticks, developed several outreach programs, and collaborated on lots of research.

Exercise: What words in the text above are too general (not specific enough)?

A group of tick researchers at UM’s has offered an exciting course on ticks, edited a useful handbook on ticks, developed several outreach programs, and collaborated on lots of research.
• with 5 senior Native American women students, built a traveling “TickMobile” that has so far shown 1,000 kindergartners in Northeast Mississippi how to safely extract ticks from themselves or other children on the playground;

• developed the “Tick Engineering Camp” through which they have recruited 10 students (including seven women and one African American) into the Center for Manufacturing Engineering; and

• sponsored Brad Paisley to the Oxford Science Café in 2012, where he performed his song “I’d Like to Check You for Ticks” for over 100 community members.
UM’s *Ticks from Other Worlds Research Group*:

- published 15 tick-related articles in peer-reviewed journals, including 5 articles with undergraduate co-authors, and one with an undergraduate, Hispanic student as the lead author [REF]

- developed a 500-level interdisciplinary course called “Genetic Tick Engineering,” which has been offered 10 times since 2005 and completed by 500 students in both chemistry and engineering programs.

- developed an e-handbook: “How to Kill a Zombie Tick,” which has been downloaded 15,000 times to Apple/iOS, Android, Kindle, and Blackberry mobile devices.
Among the K-12, undergraduate and graduate students in the PI’s group, more than 50% of the students are from underrepresented female and African American groups.

The PI has mentored four high school, nine undergraduate, and four graduate students to date, over 50% of whom are from underrepresented groups and this commitment will continue during this project period.
We will develop a K-12 outreach program of science demonstrations at the North Panola high school, North Panola Junior high school and Green Hill elementary schools. 97% of the students at these schools are African American and 87% qualify for free lunch programs. Through this outreach program, we will try to recruit these students into our high school, undergraduate and graduate programs.
A collaboration of computer scientists and K-12 STEM teacher educators at University of Mississippi will build a professional development program to incentivize and train 48 practicing Mississippi teachers to offer Advanced Placement (AP) Computer Science Principles in some of the nation’s most underserved public schools.

The result will be a 40-fold increase in Mississippi enrollments in AP Computer science courses, and a corresponding increase in the number of students who successfully complete the AP Computer Science Principles exam (with a score of at least 3 out of 5).

and from a proposed application:

*The project will lead to a more diverse STEM academic workforce at the University of Mississippi, where only one African American woman ever achieved tenure in a Core STEM discipline.*
Women enroll at disproportionately lower rates in engineering, computer sciences, physical sciences, and economics. (NSF)

"Foreign students earned 57% of all engineering doctorates, 54% of all computer science degrees, and 51% of physics doctoral degrees. Their overall share of S&E degrees was one-third." (NSF)

By 2020, employment in all computer occupations is expected to increase by 22%. (ComputerWorld)
Very few students in Mississippi take (or have access to) Advanced Placement Computer Science courses and exams; in fact, only 104 Mississippians have attempted the AP CS A exam over the past 10 years (College Board, 2014, 2005-2013).

No female or African American in Mississippi is known to have passed the AP CS exam over the last decade, and no African American has even come close. In particular, where Mississippi is concerned:

- Over the past nine years, no white female has attempted the AP CS exam.
- Over the past six years, no African American female has attempted the AP CS exam.
- Over the last decade, no female of any race or ethnic group is known to have passed the AP CS exam.
- Over the last decade, no African American is known to have scored any better than a 1 (out of 5) on the AP CS exam, even though 59 African Americans (26 male, 33 female) have tried.
While Mississippi’s AP CS statistics are particularly bleak, Mississippi is not exactly leading the nation in other AP subjects either.

Mississippi lags the nation in both the percentage of its students who take AP exams in any subject (2014 rank: 49th at 17.2%, leading only North Dakota) and the percentage of AP exams passed in any subject with a score of 3 or better (2014 rank: 49th at 32.4%, leading only Arkansas).

In 2014, only about 44% (126 out 282) of Mississippi’s public high schools even offered AP courses of any type (College Board, 2014).
The proposed project is the single most important opportunity our state has to simultaneously transform its educational, research, healthcare, and public safety landscape, through the creation of a combined network of fiber optic and wireless towers that will place middle mile anchor institutions geographically throughout Mississippi and ultimately provide coverage to 97% of the state.

Comment [11]
Can you link this to any statewide action plan or official document that states these objectives as a statewide goal?

Comment [10]
Avoid sweeping statements and rhetoric. Make as fact-based as possible.
Be Specific; Be Considerate; Be Factual
Very Strenuously Object to Almost All Adverbs

- *A Few Good Men*: 1:38:00
  
  https://www.youtube.com/watch?v=bOnRHAyXqYY
Be Specific; Be Considerate; Be Factual
Very Strenuously Object to Almost All Adverbs

• A Few Good Men: 1:38:00
  https://www.youtube.com/watch?v=bOnRHAYXqYY

• Use facts instead

• The users should draw their own conclusions

• Some adverbs to watch out for:
  clearly, importantly, significantly

• When is it ok to use adverbs?
  • Sparingly, for effect
  • To convey meaning, when no other word will do

  The results were statistically significant
Partners include the nonprofit Mississippi Economic Growth Alliance Point of Presence (MEGAPOP), the Mississippi Wireless Communication Commission (WCC), the Mississippi Research Consortium (MRC, representing the four research universities), the University of Mississippi Medical Center, and the Mississippi Department of Information Technology Services (ITS), with strong support from numerous other organizations in the public and private sector.

Some adjectives to watch out for:

numerous, significant, important, useful, exciting, several
## Be Considerate: Use a Logic Model

### Be Considerate: Use the Sponsor’s Language

**Context:** The UM STEM professoriate does not reflect the University's commitment to inclusiveness and diversity. NSF ADVANCE IT grant proposal: Transform how we recruit and support women and communicate our commitment.

Tips for Today

1. Take Time to Learn the Rules (Internal/External): **Follow The Rules**
2. Know What You Want to Say: **Say It; Ask Someone to Read It; Repeat**
3. Know What the Sponsor Wants to Hear
4. Translate What You Want to Say into What the Sponsor Wants to Hear
5. Write like a Lawyer, a Journalist, and a Scholar (in that order)
6. Be Specific; Be Considerate; Be Factual
7. **Anticipate that Your 1st Draft Will Suck:** **Make Plans to Get Help Fixing It**
8. Anticipate that Your 1st Proposal Will Be Declined: **Adapt and Overcome**
Your Proposal Sucks
Solicit Contributions from Diverse Teammates

- Early on, all proposals will suck.
- Your task: go “from suck to not-suck”
- Rework, rework, and rework again
- Submit the 27th version, not the 1st
- Give yourself time
- Get lots of others to look
- ORSP: Enhanced Review Services
Plan to Throw One Out  (Fred Brooks)

“For most [software] projects, the first system built is barely useable: too slow, too big, too hard to use, or all 3. It ends up being discarded and redesigned. The discard and redesign may be done in one lump, or piece-by-piece, but it will be done.”

Similarly, by the time you submit a GOOD proposal, it might be the 15th, 20th, or 30th revised version.

So, leave plenty of time for reviews and revisions.
Tips for Today

1. Take Time to Learn the Rules (Internal/External): *Follow The Rules*
2. Know What You Want to Say: *Say It; Ask Someone to Read It; Repeat*
3. Know What the Sponsor Wants to Hear
4. Translate What You Want to Say into What the Sponsor Wants to Hear
5. Write like a Lawyer, a Journalist, and a Scholar (in that order)
6. Be Specific; Be Considerate; Be Factual
7. Anticipate that Your 1st Draft Will Suck: *Make Plans to Get Help Fixing It*
8. Anticipate that Your 1st Proposal Will Be Declined: *Adapt and Overcome*
